Basic Fire Alarm Technology (Day 1)

This is a one-day introductory course for individuals with little or no background in the fire alarm industry. Included are definitions, terminology, detectors, annunciators, digital communicators, releasing service, waterflow devices and the basics of voice evacuation.

This course also covers basic codes such as NFPA 72 and the American Disabilities Act (ADA).

You MUST attend the Addressable Fire Alarm Control Panels course on Days 2 & 3 to be eligible for a BASIC certificate.

Prerequisites: None.

Addressable Fire Alarm Control Panels (Day 2 & 3):

This two-day course module is designed for technicians and sales personnel. It covers panel selection, features, installation methods, programming and troubleshooting of addressable fire alarm control panels with the capability of providing an excess of 600 addressable devices.

Prerequisites: Individuals should be familiar with basic fire alarm and system terminology or attend the Basic Fire Alarm Technology class prior to attending this class.

Products Discussed: MS-9050UD, MS9200UDLS and the MS-9600 Intelligent Addressable Fire Alarm Control Panels. This course also covers the [ACC-25/50 Audio Command Center](#).

You MUST register online at www.firelite.com no later than Thursday, December 6th. Registrations submitted after December 6th will not be given pre-registered status but will be considered walk-ins. Space or Literature may not be available for walk-ins. Due to popular demand, Fire•Lite reserves the right to limit the number of attendees per company if necessary. Fire•Lite cannot accept registrations once a class is marked "FULL." Refer to the web site for class status.
